Sentinel Ridge Consulting Forms Partnership with KineticD to Offer Cloud-Based Computing Services to Vancouver Island Homes and Businesses

Mill Bay, BC August 9, 2011 – Sentinel Ridge Consulting has formed a partnership with KineticD, one of Canada's leading providers of cloud-based computing services, whereby Sentinel Ridge Consulting will resell KineticD services to homes and businesses throughout Vancouver Island.

KineticD will provide the infrastructure, which includes a state of the art data centre in Toronto, while Sentinel Ridge Consulting will provide installation, configuration and troubleshooting support.

Services offered include online backup, secure remote access and secure file sharing.

“We are excited to have the opportunity to offer these award winning services to the residents of Vancouver Island”, stated Sentinel Ridge Consulting President Ian Parker. “Online backup is definitely the way of the future and the remote access and file sharing solutions, available at no extra cost, will be especially attractive for small businesses that can neither afford nor justify a virtual private network solution.”

Customers who subscribe to the services through Sentinel Ridge Consulting will receive unlimited installation, configuration and troubleshooting support for as long as they remain subscribers.

Sentinel Ridge Consulting is a total information security solutions consultant, offering companies, government agencies, educational institutions and individuals assistance in securing their information assets through the effective use of appropriate security technologies. For further information, contact Ian Parker at 250-929-1199.
